## INTRODUCTION

In the rapidly evolving landscape of cryptocurrency and blockchain technology, innovation thrives on the diversity of minds that contribute to its growth. But we have to admit that real intelligence is not often rewarded, due to the tendency to gravitate around trends, degens, and speculative madness. Above all, crypto communities often offer pay-to-win schemes, so that rich whales become richer. This project aims to put the spotlight back on the intelligence of a community and truly involved investors.

With the collaboration of a passionate team, we have developed a play-to-earn platform that allows us to share project resources wisely, while remaining free to access. Everyone should feel thanked for their involvement and trust in this paradigm-shift crypto project. Ready to embark on a smart adventure ?

*CleverGame Team*

***„We want to bring opportunities for smart people, not for rich whales.“***

# OPERATING PRINCIPLE

A web3.0 play-to-earn platform :

- **IQ Games** with 24h slot sessions.
- **BattleGame** sessions with intelligence duels between players.
- **\$CG** native token with community reflections and a Buyback Wallet.
- **CleverStaking** with adaptive rewards depending on your regularity.

*„Everyone wins something, even if you're not at the top of the leaderboard.”*

## IQ Games

- Players can enter freely into 4 Intelligence Quizzes:
  - ❖ Musical Intelligence: sense of melody, rythm and harmony.
  - ❖ Social Intelligence: funnymeme game with community votes.
  - ❖ Logical Intelligence: sense of mathematical implications.
  - ❖ Verbal Intelligence: verbal subtlety quiz about expressive situations.
- Players get their IQ scores and get ranked in a global leaderbord.
- Everyday, at 8pm UTC rewards are shared in a decreasing exponential way.

*„Everyday at 8pm UTC, players get one more chance to improve their scores and earn more.”*

# BattleGame

- Players can test their intelligence in one-question duels.
  - ❖ Free session: no money is involved, just to train.
  - ❖ Bet session: each player wagers a sum of money.
- The winner (the fastest to answer correctly) takes his opponent's bet.

# \$CG

- Native token of the CleverGame project on Arbitrum with symbol \$CG.
- Sell tax for investors reflections and dedicated Airdrops.
- Transaction tax in the platform, to fill a „Buyback Wallet” that will buy \$CG at the end of the day/week.

# CleverStaking

## Daily Staking:

$$\frac{\text{fidelity} \times \text{IQratio} \times \$\text{CGamount}}{20} \quad \frac{\$5\text{M } \$\text{CG}}{5\text{M } \$\text{CG}}$$

- Fidelity: 20days-cycles factor
- IQratio: [0-1] between IQ [95-150]
- \$CGamount: 5M \$CG-cycle factor  
↳ 4ETH at DEX launch

- Adaptive system to reward loyal players, based on fidelity index, your IQ scores and the \$CG amount you hold.
- To be eligible, a player must have completed all Games of the current session, hold \$CG tokens and claim it everyday.
- It's not enough to be rich, you'll also have to justify your commitment to the platform in order to earn significant profits.
- Fidelity will be increased by 1 everyday, or decreased by 10 every inactive day.
- Staking amount will be paid on the platform at the end of the session.

# FUNDING

Mandatory advertising click traffic to access free games.

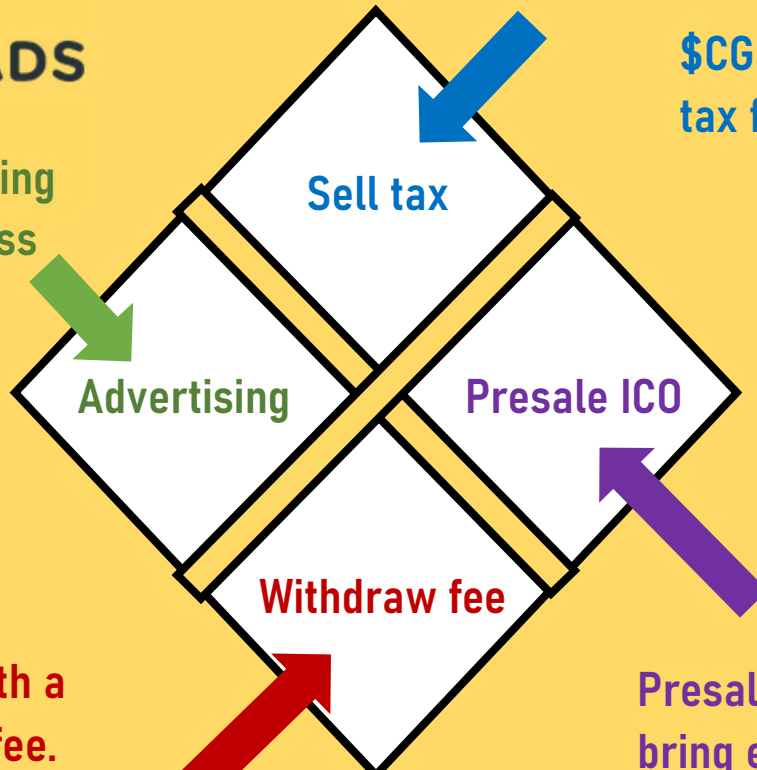

Google Ads

Users contribute with a platform withdraw fee.

**5%**

**6%**

\$CG will have a 6% sell tax for financial stability.

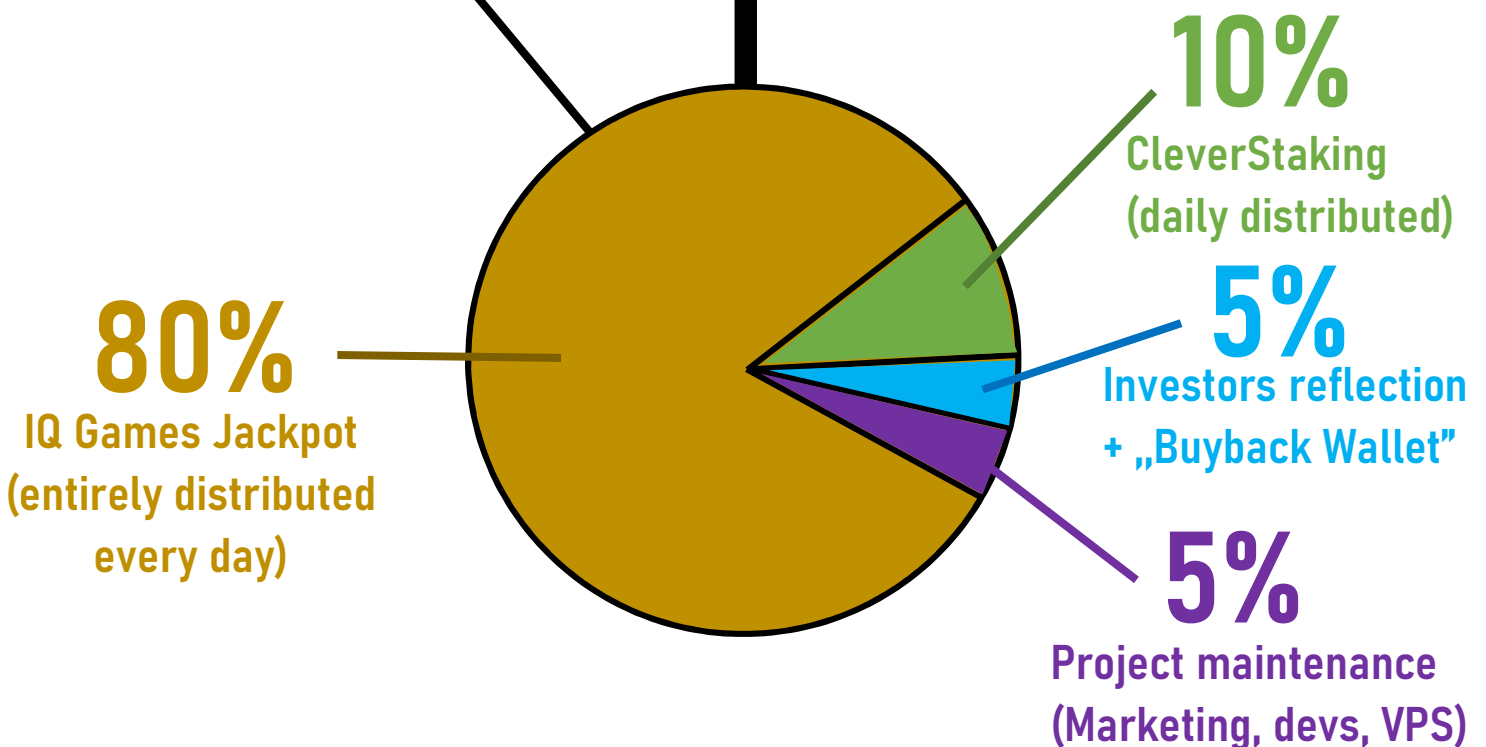

GEMPAD

Presale organization to bring early investors.
